TRACK AND TRACE CAPABILITY

EMO Trans offers a "real time" web based track and trace system. Shipment milestones are updated throughout the process to allow our customers to track their shipment from beginning to end. Customers are able to extract data from the Track and Trace website in various formats such as Excel. EMO Trans has the ability to capture details such as reference numbers to enhance your search capability within the website.

Our Global Tracking System offers:

- 24/7/365 Customer access
- Door to Door visibility
- Document Imaging
- Global Network Listing
- Drill down for detail on specific shipments
- Secure Customer Login
- Shipment tracking and visibility
- Multiple search criteria

EMO Trans offers a solution that is customer specific! We can offer as little as basic milestones in Track and Trace, to an integrated Purchase Order Management system to give complete shipment detail visibility.

EMO Trans supports detailed transportation tracking and purchase order visibility including the fulfillment of the Purchase Orders from Open, Partial to Completed PO status. EMO Trans provides document visibility to include Purchase Order/Packing List details for line items shipped, all parties to the transaction – Supplier/Shipper - Ship to/Consignee, and on-forwarding transportation details.

AUTOMOTIVE SOLUTIONS

EMO Trans puts its philosophy of ***Success by Performance*** to work every day on behalf of notable clients in the automotive industry. Specialized services include:

Door-to-Door Vehicle Transportation
From ocean or air container to final destination, EMO Trans offers 'white glove' treatment for all kinds of vehicles. From concept car to Ro/Ro services in all of the major markets, we offer solutions in facilitating a true automotive supply chain.

Supplier Purchase Order Management
EMO Trans supports detailed transportation tracking and purchase order visibility including the ability to track the fulfillment of purchase order details. The customer has a detailed view of the physical purchase order/packing list and transportation details of lines on the purchase order that have shipped, as well as showing which purchase order line items and item numbers remain open.

"Milk Run" Management
EMO Trans transports parts efficiently from suppliers to automobile manufacturers' facilities. We support customers' efforts to achieve lean operations and inventory levels with expedited response times and Just In Time delivery.

Material Quality Inspections
EMO Trans knows that quality is a top concern in the automotive industry. Through third party Total Quality Management, we ensure that all quality inspection standards are being followed under ISO 9001:2000/ TS16949. We're committed to monitoring goods received from suppliers and helping to ensure that parts and materials are of the correct quality or specifications before they're sent to the next stop in the supply chain.

Pick and Pack Operations
Our advanced order fulfillment process is designed to reduce your inventory and labor needs by getting essential parts packaged and out the door to you quickly.

EMO TRANS' SERVICE CAPABILITIES

24/7/365 Service
EMO Trans is supported by a worldwide network of services that are manned 24/7/365 by experienced personnel. At EMO Trans, we can handle your shipment, point to point.

Next Flight Out (NFO)
EMO Trans' personnel are specifically trained to identify the most time efficient routing of your express order by utilizing our unique NFO service. Our extensive global and domestic network of offices maintain an updated air, road and rail schedule into and out of their locations, so we can book your shipment onboard the next available aircraft, train or road transport after order readiness has been confirmed.

Returnable Packaging
EMO Trans offers a complete set of returnable packaging (collapsible totes, cages, plastic pallets, etc). Managing the inventory control of the returnable packaging and providing seamless returnable logistics solutions is a key component in the automotive supply chain. As every package is unique to the respective part, it is crucial to maintain a proactive flow of packaging inventory.

Success by Performance

Reverse Logistics
Should you encounter a part rejection or replacement request, EMO Trans can offer reverse logistics solutions by ensuring the RM (Return Material) information is submitted to the client. This allows your QM Team to capture returned/rejected inventory parts in your ERP system.

Automotive After-Market Logistics
With the growing popularity of customized vehicles, we can offer solutions from wheels and tires to exhaust systems to cold induction air systems! As most manufacturing is done offshore, we can offer a distribution concept to single end buyer or higher volume retail shops.

Dedicated Ground Transport
EMO Trans combines efficient air transport to remote sites with dedicated delivery services. These delivery vehicles are used to pick up from the arriving flight and deliver time critical packages.

Remote Site Logistics Management
EMO Trans recognizes that the success of logistics planning for remote locations has a significant impact on the success of the whole project and influences management of costs and delivery of project scheduling. EMO Trans provides a full suite of services to manage the entire supply chain.

Odd-Shaped, Over-Sized, Over-Weight Parts
EMO Trans has extensive expertise in the movement of over dimensional, out of gauge cargo. We offer a solution set for true automotive projects such as new welding cabins, injection molding machinery, aluminum presses, conveyor systems and tooling. Our experienced personnel are well trained in the differing oversize and over mass regulations from state to state. Handling oversize and over mass consignments is a specialized skill – call EMO Trans for a complete solution.

Dangerous Goods Movement
EMO Trans is committed to offering our valued customer base a dangerous goods service that is aligned with industry best practices. All EMO Trans dangerous goods service providers undergo extensive and continuous in-house and industry provided training, which includes but is not limited to the following:

- In house training in aviation and road transport procedures and documentary requirements
- IMO/IMDG training and compliance for all goods transported by sea
- Industry provided training in respect to dangerous goods by air acceptance training
- Airfreight Security Regulations training
