EMO TRANS 3PL SOLUTION

Pick Environment and Processes

You require and expect your goods / garments to be handled and stored with the utmost respect. This ensures that your clients receive their purchase in immaculate condition every time. To this end, the EMO Trans 3PL Solution offers Storage and Pick areas that are carpeted, painted and temperature controlled.

Presentation to your client, be it a boutique, a chain store or an on line client, leaves a lasting impression. EMO Trans considers this an integral part of the process, and as such no detail is too small for us to add to complete your image in the market.

Security

EMO Trans recognises your goods are both desirable and valuable. To this end we have instituted the highest level of security within our facilities. This includes (but not limited to) full surveillance cameras, electronic scanned entry, 24 hour security guards on premises.

Order and Inventory Integration

State of the art IT systems allow for the full integration of your order placement systems direct to the pick team at our facility resulting in fast and accurate out turn and real time updates to your inventory control.

Tracking details are electronically placed in your system at the time of departure to the end client.

EDI / ASN / Transact Messaging

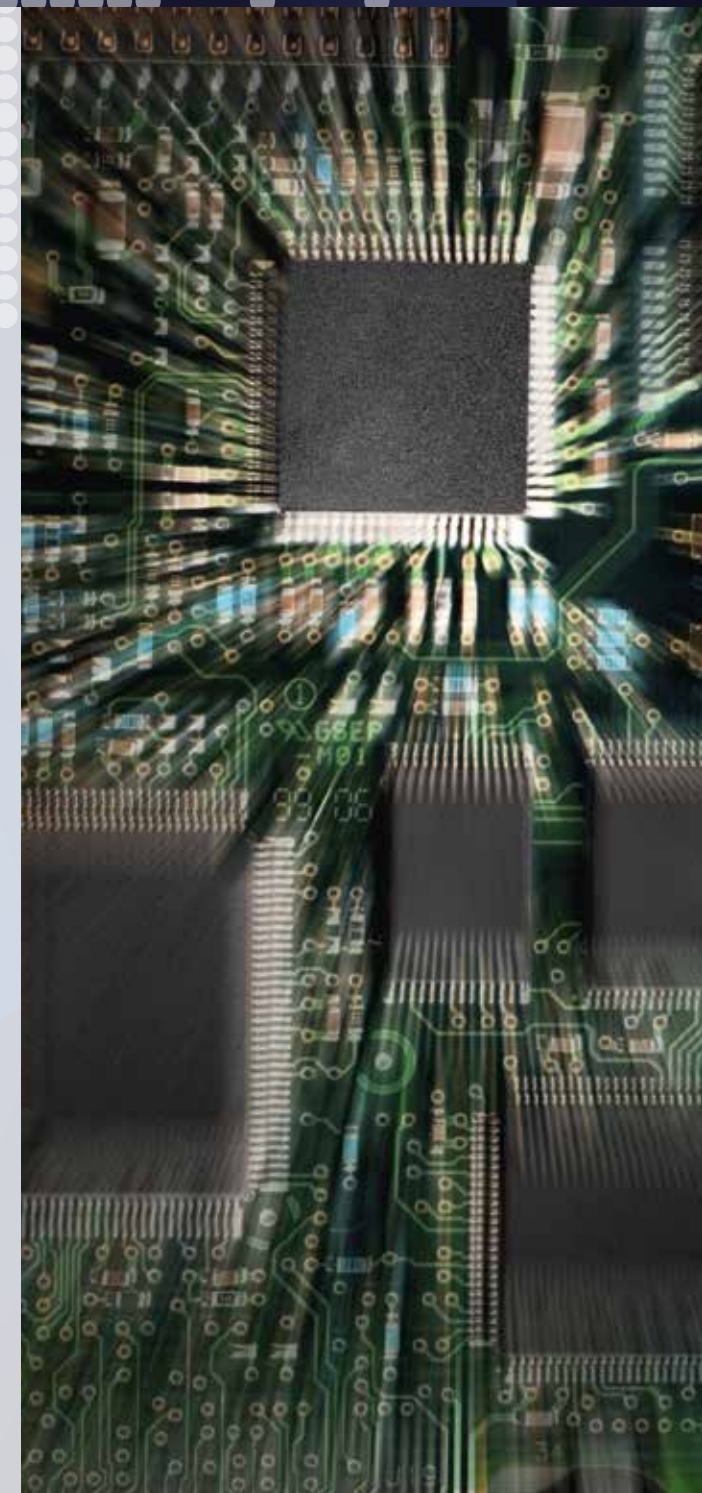

Using our EDI (Electronic Data Interchange) software and services you can exchange a wide variety of transactions with your business partners, including POs, ASNs, invoices and payment instructions. We support all of the popular EDI standards including Tradacoms, ANSI X.12 and EDIFACT as well as communications protocols such as AS2 and FTP.

Inventory Control and Reporting

EMO Trans 3PL Solution offers a range and level of reporting data far beyond the industry standard. We are happy to work with you to provide a level of real time, totally accurate, reporting that not only enables total confidence in your inventory but also both confirms and enhances your business planning and structures

Milestone Notifications

For those demanding clients with tight timelines, we can also add extra assurance by adding automated milestone reporting. This feature, within our system, sends out "actioned" emails to any addresses nominated the instant a shipment passes any nominated points within the process.

TRACK AND TRACE CAPABILITY

Emo Trans 3PL Solution offers a “real time” web based track and trace system for our clients. The shipment milestones are updated automatically as each milestone event occurs. Both you and your customers are able to download data from this data base, the data base itself can be expanded to capture additional fields required by clients. As noted above, this can also be extended to integrate seamlessly into your in house systems for ease of shipment monitoring.

Our Shipment Tracking System offers,

- Door to Door Visibility
- Document Imaging
- Global Network Listing
- Industry Resources Links
- Secure Customer Login
- Shipment Tracking and Visibility
- 24 / 7 / 52 Customer Access
